Introduction

Leading the way clinically for Greater Manchester – Clinical Leaders' Summit aims to bring together clinical leaders from across GM. The Summit will be by invitation only and will aim to engage with clinical leaders across a range of health and social care professions. We will be aiming to not only invite senior clinical staff but also identify those clinicians who represent our up-and-coming talent and those we might consider to be 'unusual suspects'.

Ultimately we want to ensure that clinicians have a high level of visibility within the planning, commissioning and delivery of high quality health and care services and this Summit is a way of building a clinical community (collaborative) who have significant positive impact across GMs and care system.

The day will focus on two key areas for our clinical leaders and is in support of the quality improvement and governance agenda of the Partnership:

1. Well-led services
2. Patient safety

Stakeholders

This Summit aims to bring together clinical leaders from across GM and is by invite only to engage with clinical leaders across a range of professions (not just medical staff).
