Improvement Support Team
Safer, faster, better care for patients

South West Single Handed Care Event 20TH September'22

This strategic event is delivered by A1 Risk Solutions and hosted by NHS South West. **The day is aimed primarily at those with influence to embed the approach within their services.** It will help you to explore the benefits, implementation and barriers to the Single Handed Care approach and provide opportunity to gain hands on experience of equipment available to support the approach.

As demand is high, please could I ask you to prioritise 3 from each organisation in the first instance. If there are any spaces left we will publicise this closer to the time.

Single Handed Care is known to have many benefits to organisations, patients and staff including improved flow through organisations and systems, patients being more likely to return home and a reduction in deconditioning.

Venue BAWA Healthcare and Leisure
