

Neonatal Jaundice Study Day Programme

Jaundice in Darker Skin Tone Babies

Monday September 29th 2025

09:30-16:30

Welcome to the Neonatal Jaundice Study Day Programme, Join us as we explore the challenges of recognising and managing jaundice in babies with darker skin tones. While neonatal jaundice is common, it often goes under-detected in Black and Brown infants due to differences in presentation and systemic bias. This programme highlights key clinical insights, shares practical strategies, and promotes equitable, informed care for all newborns.

Preliminary Agenda

Understanding Neonatal Jaundice, Complications and Medico-Legal Considerations

iParent Story

Bridging the Gap: Clinical Understanding of Jaundice in Black and Brown Babies and
the Bias Impacting Detection

Working with Parents: Inclusive and Culturally Informed Approaches
